

30mm Explorer Range

The Explorer 30 is a dependable alternative when budget is a priority. This series is around the same price as many average quality powdercoated steel marquees. The Explorer is a strong, rust free aluminium marquee.

Fantastic Value

The Explorer 30 uses technology that has trickled down from our other marquees. The 30mm legs are strong, the frame is smooth to use and handling is easy.

Application

The Explorer 30 is a family favourite for BBQs in the backyard or picnics. It makes a fantastic cook tent for camping. Sports enthusiasts and parents can take their Explorer along to events and set up in just 60 seconds.

37mm K2 Range

The K2 37 offers a combination of strength and value in one product. This range is easy to handle and fast to erect, meeting the needs of customers who require fast & flexible weather protection.

Smart Purchase

The K2 37 is designed for easy handling and fast set up. The smooth concertina action of the trusses and a choice of PVC enforced polyester or imported belgian 100% PVC roof combine to offer a balanced package.

Application

The K2 37 is proven and popular with schools, charities, sports clubs and child care centres. Regular campers, motorsport enthusiasts and pit crews and market stallers appreciate the design and value of the K2 37.

40mm Summit Range

The Summit 40 is the "benchmark" portable marquee in Australia. Offering industry leading design with a combination of genuine quality and choice. We export the Summit to 20 countries.

Commercial Quality

The Summit 40 is designed for heavy duty usage. The 40mm aluminium legs, reinforced roof trusses and extruded aluminium truss connectors offer an easy to erect marquee that will last for years. The choice of PVC enforced polyester or 100% PVC roof is ideal for printing.

Application

The Summit 40 has been the choice for thousands of corporate marketers, SME business buyers, sporting clubs, larger school customers and regular market stall operators.

57mm Tectonic Range

The top of the range Tectonic 57 is EXTRA heavy-duty and ideal for industrial or emergency applications. The build quality and design provides exceptional durability, strength, practicality and value-for-money.

Extra Heavy Duty

Tectonic 57 is suitable for usage in the regular tough conditions experienced by hire companies, military, emergency services, surf clubs, industrial and mining companies.

Application

The Tectonic 57 is made from high strength 6005 T6 aluminium. This means the raw material has been artificially aged during production for higher quality & strength.

Extreme is the ONLY marquee company offering the security of quality specifications, diligence in design and dealing direct with the manufacturer for maximum savings. Avoid marquees that use nylon or plastic products in their frames or feet.
